

LiquidMate[®]

Liquid Monitoring at Excellence

The cooling lubricant is the blood that flows through the veins of your production.

Our LiquidMate[®] automates the monitoring of this elixir of life for you.

That's what we call
#industrialwellness

Innovative process optimization

Improves the process reliability of your production and thereby increases product quality.

100% Made in Germany

Our quality promise. Developed in Germany and produced with components from German premium manufacturers.

Focus on occupational safety

Do not leave the health of your employees to chance.

Sustainable use of resources

Careful use of resources. For the love of the Environment

Lifetime Extension

50%

Higher cooling lubricant lifetime

Health Certificate

TRGS 611

Documentation for the employers' liability insurance association

Strengthen the immune system

50%

reduced downtime

LiquidMate[®]

Liquid Monitoring at Excellence

Automated Liquid Monitoring

**Real-time measurement of the parameters
incl. re-dosing of the cooling lubricant**

Subject of digitization

**Pioneer of Industry 4.0 and
center of the Industrial IoT**

Core element of connectivity

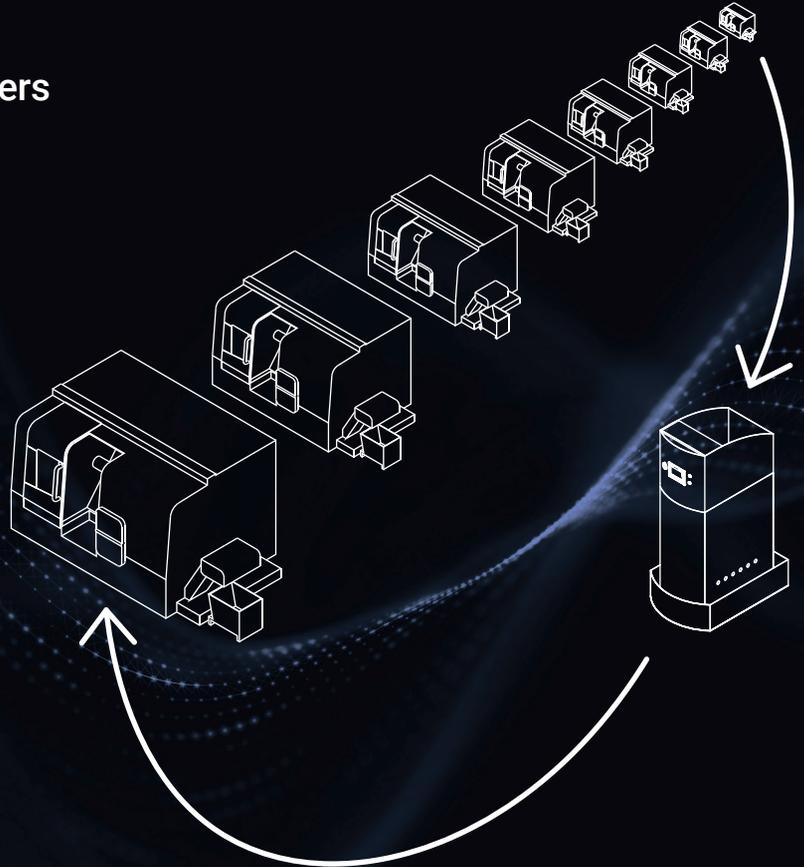

**Connect up to 12 machines
per LiquidMate[®]**

Cloud-based information processing

Dashboard visualization

Sensor controlled monitoring

**Measurement of the relevant
factors for production and guidelines**
